DETAILED ACTION

Allowable Subject Matter

1. Claims 14-30 are allowed.

The following is an examiner's statement of reasons for allowance: The allowability of the claims resides, at least in part, that the closest prior art of record **De Willie et al. (US 6,167,338)** does not disclose or suggest, alone or in combination the step of:

Regarding independent claim 14, **replacing, at substantially regular intervals occurring while said motor is switched on, said operating data value stored in the nonvolatile memory by a current value of said variable from said volatile memory,** in combination with the other elements and features of the claimed invention.

With respect to independent claim 25, **replacing, at substantially regular intervals occurring while said motor is switched on, motor operating data stored in the nonvolatile memory by current motor operating data stored in said volatile memory,** in combination with the other elements and features of the claimed invention.

As for independent claim 29, **wherein the microprocessor, during operation of the motor, controls writing operations for periodically writing motor operating data from said volatile memory into said nonvolatile memory,** in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2125

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
